

# Chapels Feature Thermal Windows

The Church of Jesus Christ of Latter-Day Saints, based in Utah, has over 5 million members in the United States (10 million worldwide). The Church's education system includes Brigham Young University, Ricks College, LDS Business College, seminaries and institutes of religion. In addition, the church operates temples, chapels and schools throughout the world.

Chapels and seminaries are in almost continuous use, and require windows that are practical, energy-efficient, and aesthetically pleasing. To achieve these goals, The Church of Jesus Christ of Latter-Day Saints has specified windows from Thermal Windows, Inc. on over 70 buildings nationwide.

Thermal Windows, Inc. is in its 21st year of quality window design

and production. Based in Tulsa, Oklahoma, with sales and manufacturing operations, Thermal Windows occupies over 100,000 square feet and employs over 150 people. With Thermal Windows in-house research, design and testing programs, The Church of Jesus Christ of Latter-Day Saints felt confident in selecting Thermal Window's Series 500 time and time again.

Thermal Window Series 500 line of windows include single hung windows that tilt in for easy cleaning, horizontal rolling windows and picture windows. Mullions allow the windows to be joined together in virtually unlimited combinations. Plus, panning systems are available for special installation requirements, which makes historical retrofit economical.

Thermal Window's Series 500 was selected time after time by the church.

Some other features of the Series 500 by Thermal Windows include extruded aluminum frames with structural "Thermal Barrier" throughout every section; ASTM Class "A" double glazed insulating glass with a 7/8-inch overall thickness; double .250 polypile, twin fin weatherstripping at points of contact; and double locks.

In addition to testing and upgrading existing products, Thermal Windows continues to design new products to meet the fenestration needs of the residential, commercial and heavy commercial markets. Thermal Windows ships worldwide, including Alaska, Hawaii, Puerto Rico and Russia.
