Single Hung Windows

Commercial Single Hung Windows for Retrofit and New Construction

The Banks - Cincinnati, OH
Series 505, Light Gray

Mariner Bay at Annapolis Towne Centre - Annapolis, MD
Series 500, Bronze

Fleet Street at National Harbor - Washington, DC
Series 4100, Collingwood

Avalon Mosaic - Fairfax, VA
Series 505, Black

Manufactured by Thermal Windows, Inc. • 12805 E. 31st Street • Tulsa, OK 74146 • (800) 259-7580 • Fax (918) 665-2197
Website: www.thermalwindows.com    Email: info@thermalwindows.com
SINGLE HUNG WINDOWS

Standard Features

• Custom Sizes
• 2⅝" frame depth (4" in Series 4100)
• Integral Thermal Barrier throughout frame and sash
• Spiral balances (Block and tackle on Series 4100)
• AAMA 2604 organic powder coat finish
• 5 standard powder coat finish colors (see ‘Finishes’ section)
• Tested to AAMA specifications
• ⅞" Insulated glass (1" in Series 4100)
• Extruded screen frame with fiberglass mesh
• Operable sash tilts in for easy cleaning (Side load in Series 4100)

Available Options

• 3¼" frame depth (in selected models)
• Ultra-lift balances; Block and tackle balances
• Dual seal
• Anodized finishes
• AAMA 2605 high-performance finishes
• Hundreds of special colors
• Hurricane-resistant glazing available in some models
• Low-E glass; tinted glass; obscure (frosted) glass
• Spandrel glass; Insulating panels
• Wire screen mesh
• Hurricane screens
• Security screens
• Panning, receptor systems, subsills, snap trim and other accessories
• Internal, external and special angled mullions
• Eyebrows (arched tops)
• Nailing fin
• Front flanged frame
• Lock-out tilt latches
• Internal muntins
I. GENERAL:

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 500" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 500" is a single hung with thermally improved frame and sash consisting of an operable, tilt lower sash and a fixed upper lite. The specifications and materials for the "Series 500" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 2.625" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debrided.

Locks - Shall consist of a cam latch at the interlocking meeting rail along with an independent spring loaded latch for the sash.

Balances - Sash will be balanced by field adjustable spirally wound spring sash balances attached to the main frame by pivot sash shoes of nylon. Balances shall hold the sash stationary in any position along the full range of sash travel. Where weight of sash requires, double sash balances will be used. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250 polypile with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass in the operable sash shall be factory glazed with a marine (wrap around) reusable vinyl glazing channel. The fixed upper lite shall be inside glazed, using a rigid vinyl glazing bead. The insulated glass units shall be .875" overall thickness with two panes of double strength glass, separated by a .625" air space for optimum insulation. All insulated glass units shall meet the requirements of the ASTM E 2190 specification, Class "A".

Screens - Screen frame shall be of hollow extruded aluminum frames. Finish shall match the main frames and sash. Insect screening shall be fiberglass or aluminum wire secured with a vinyl spline. Screens shall be half length.

Operation - The lower sash is operable on the "Series 500" Single Hung window and will raise for ventilation. The lower sash is equipped with a release latch so that it will tilt in for cleaning and is removable from the interior for ease of maintenance.

IV. PERFORMANCE:

Structural - Shall meet the requirements of AAMA/WDMA/CSA 101/I.S.2/A440-05, H-C45 specification.

Thermal - Shall meet the requirements of AAMA 1503.1 CRF 57 / 50.

NFRC – Shall meet the requirements of NFRC 100 and 200.

Forced Entry - Shall meet the requirements for ASTM F588 Load Identification Grade 10.

Sound Transmission Class - Shall meet the requirements of ASTM E90. Ratings vary depending upon glazing. See Product Selection Guide for summary.

V. INSTALLATION:

Qualifications - Installation shall be performed by skilled, experienced tradesmen. Units shall be installed plumb, level, square and shall be secured in accordance with detailed shop drawings. A non-hardening sealant compatible with aluminum shall be provided by the installer and applied in sufficient quantity to provide a weathertight seal between the window and surrounding construction.

Installation Details - The window manufacturer shall submit complete installation details for the Architects approval. The drawings shall show elevations of windows, full size details of frame and vents, details of construction and anchorage of window.

SPECIFICATIONS

I. GENERAL:

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 500" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 500" is a single hung with thermally improved frame and sash consisting of an operable, tilt lower sash and a fixed upper lite. The specifications and materials for the "Series 500" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 3.250" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debrided.

Locks - Shall consist of a cam latch at the interlocking meeting rail along with an independent spring loaded latch for the sash.

Balances - Sash will be balanced by field adjustable spirally wound spring sash balances attached to the main frame by pivot sash shoes of nylon. Balances shall hold the sash stationary in any position along the full range of sash travel. Where weight of sash requires, double sash balances will be used. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250” polyple with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass in the operable sash shall be factory glazed with a marine (wrap around) reusable vinyl glazing channel. The fixed upper lite shall be inside glazed, using a rigid vinyl glazing bead. The insulated glass units shall be .875” overall thickness with two panes of double strength glass, separated by a .625” air space for optimum insulation. All insulated glass units shall meet the requirements of the ASTM E 2190 specification, Class "A".

Screens - Screen frame shall be of hollow extruded aluminum frames. Finish shall match the main frames and sash. Insect screening shall be fiberglass or aluminum wire secured with a vinyl spline. Screens shall be half length.

Finish - Shall be a factory applied baked polyurethane powder coat finish meeting the requirements of AAMA 2604 for Pigmented Organic Coating on Extruded Aluminum. Refer to “Colors and Finishes” chart for examples. Bronze anodizing, clear anodizing and high performance AAMA 2605 finishes are optional.

Operation - The lower sash is operable on the "Series 500" Single Hung window and will raise for ventilation. The lower sash is equipped with a release latch so that it will tilt in for cleaning and is removable from the interior for ease of maintenance.

IV. PERFORMANCE:

Structural - Shall meet the requirements of AAMA/WDMA/CSA 101/I.S.2/A440-05, H-C45 specification.

Thermal - Shall meet the requirements of AAMA 1503.1 CRF 57 / 50.

NFRC - Shall meet the requirements of NFRC 100 and 200.

Forced Entry - Shall meet the requirements for ASTM F588 Load Identification Grade 10.

Sound Transmission Class - Shall meet the requirements of ASTM E90. Ratings vary depending upon glazing. See Product Selection Guide for summary.

V. INSTALLATION:

Qualifications - Installation shall be performed by skilled, experienced tradesmen. Units shall be installed plumb, level, square and shall be secured in accordance with detailed shop drawings. I. GENERAL:

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 505" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 505" is a single hung with thermally improved frame and sash consisting of an operable, tilt lower sash and a fixed upper lite. The specifications and materials for the "Series 505" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 2.625" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debrided.

Locks - Shall consist of a cam latch at the interlocking meeting rail along with an independent spring loaded latch for the sash.

Balances - Sash will be balanced by field adjustable spirally wound spring sash balances attached to the main frame by pivot sash shoes of nylon. Balances shall hold the sash stationary in any position along the full range of sash travel. Where weight of sash requires, double sash balances will be used. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250" polypile with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass in the operable sash shall be factory glazed with a marine (wrap around) reusable vinyl glazing channel. The fixed upper lite shall be inside glazed, using a rigid vinyl glazing bead. The insulated glass units shall be .875" overall thickness with two panes of double strength glass, separated by a .625" air space for optimum insulation. All insulated glass units shall meet the requirements of the ASTM E 2190 specification, Class "A".

I. GENERAL:

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 515" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 515" is a single hung with thermally improved frame and sash consisting of an operable, tilt lower sash and a fixed upper lite. The specifications and materials for the "Series 515" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 2.625" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debridged.

Locks - Shall consist of a cam latch at the interlocking meeting rail along with an independent spring loaded latch for the sash.

Balances - Sash will be balanced by field adjustable spirally wound spring sash balances attached to the main frame by pivot sash shoes of nylon. Balances shall hold the sash stationary in any position along the full range of sash travel. Where weight of sash requires, double sash balances will be used. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250" polypile with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass in the operable sash shall be factory glazed with a marine (wrap around) reusable vinyl glazing channel. The fixed upper lite shall be inside glazed, using a rigid vinyl glazing bead. The insulated glass units shall be .875" overall thickness with two panes of double strength glass, separated by a .625" air space for optimum insulation. All insulated glass units shall meet the requirements of the ASTM E 2190 specification, Class "A".

Screens - Screen frame shall be of hollow extruded aluminum frames. Finish shall match the main frames and sash. Insect screening shall be fiberglass or aluminum wire secured with a vinyl spline. Screens shall be half length.

Finish - Shall be a factory applied baked polyurethane powder coat finish meeting the requirements of AAMA 2604 for Pigmented Organic Coating on Extruded Aluminum. Refer to “Colors and Finishes” chart for examples. Bronze anodizing, clear anodizing and high performance AAMA 2605 finishes are optional.

Operation - The lower sash is operable on the "Series 515" Single Hung window and will raise for ventilation. The lower sash is equipped with a release latch so that it will tilt in for cleaning and is removable from the interior for ease of maintenance.

IV. PERFORMANCE:

Structural - Shall meet the requirements of AAMA/WDMA/CSA 101/I.S.2/A440-08, CW-PG50 specification.

Thermal - Shall meet the requirements of AAMA 1503.1 CRF 57 / 50.

NFRC – Shall meet the requirements of NFRC 100 and 200.

Forced Entry - Shall meet the requirements for ASTM F588 Load Identification Grade 10.

Sound Transmission Class - Shall meet the requirements of ASTM E90. Ratings vary depending upon glazing. See Product Selection Guide for summary.

V. INSTALLATION:

Qualifications - Installation shall be performed by skilled, experienced tradesmen. Units shall be installed plumb, level, square and shall be secured in accordance with detailed shop drawings. A non-hardening sealant compatible with aluminum shall be provided by the installer and applied in sufficient quantity to provide a weathertight seal between the window and surrounding construction.

Installation Details - The window manufacturer shall submit complete installation details for the Architects approval. The drawings shall show elevations of windows, full size details of frame and vents, details of construction and anchorage of window.

I. GENERAL:

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 4100" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 4100" is a single hung with thermally improved frame and sash consisting of an operable, "take-out" side load lower sash and a fixed upper lite. The specifications and materials for the "Series 4100" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 4.000" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debrided.

Locks - Shall consist of a White Bronze cam latch and keeper at the interlocking meeting rail along with an independent spring loaded latch for each sash.

Balances - Sash will be balanced by standard block & tackle balances. Balances shall hold the sash stationary in any position along the full range of sash travel. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250 polypile with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass shall be factory glazed with an interior aluminum glazing bead with a wedge gasket. The insulated glass units shall be 1.000" overall thickness with two lites of .125" glass, separated by a .750" air space for optimum insulation. All insulated glass units shall meet the requirements of the ASTM E 2190 specification, Class "A". Options: Applied muntins with insulated glazing.

Screens - Screen frame shall be of hollow extruded aluminum frames. Finish shall match the main frames and sash. Insect screening shall be fiberglass or aluminum wire secured with a vinyl spline. Screens shall be half length.

Finish - Shall be a factory applied baked polyurethane powder coat finish meeting the requirements of AAMA 2604 for Pigmented Organic Coating on Extruded Aluminum. Standard Tier I colors available are bronze, white, crème, sandstone, and almond. Bronze anodizing, clear anodizing and high performance AAMA 605.2 finishes are optional.

Operation - The lower sash is operable on the "Series 4100" Single Hung window and will raise for ventilation. The lower sash is equipped with a release latch so that it will side load "take-out" for ease of maintenance.

IV. PERFORMANCE:

Structural - Shall meet the requirements of ANSI/AAMA A440-05 HC/AW75 specification.

Thermal - Shall meet the requirements of AAMA 1503.1 CRF 57/52.

AT/FP – Shall meet the requirements of UFC 4-010-01. Engineering Calculations to ASTM F 2248-03 and/or Shock Tube Testing to ASTM F 1642/GSA TS01 Level 2/Minimal Hazard.

Forced Entry - Shall meet the requirements for ASTM F588 Load Identification Grade 10.

Life Cycle – Product meets the criteria including passing air and water tests at the conclusion of the cycle test requirements of AAMA 101 and AAMA 910.

V. INSTALLATION:

Qualifications - Only skilled mechanics with experience in this trade. Units shall be installed plumb, level, square and shall be secured in accordance with detailed shop drawings. A non-hardening sealant compatible with aluminum shall be provided by the installer and applied in sufficient quantity to provide a weathertight seal between the window and surrounding construction.

Installation Details - The window manufacturer shall submit complete installation details for the Architects approval. The drawings shall show elevations of windows, full size details of frame and vents, details of construction and anchorage of window.
SERIES 4100 4” SINGLE HUNG (AW75)

Typical Configurations (Scale: Half Size)

See Accessories section for additional options
I. GENERAL: Hurricane Impact Test - Double Glazed

Scope of Work - Furnish all necessary materials, labor and equipment for the complete installation of aluminum windows for this project as shown on the drawings and herein specified. Windows shall be the "Series 4100HD" as manufactured by Thermal Windows, Inc., Tulsa, Oklahoma. The "Series 4100HD" is a single hung with thermally improved frame and sash consisting of an operable, "take-out" side load lower sash and a fixed upper lite. The specifications and materials for the "Series 4100HD" are as follows:

II. PRODUCTS:

Materials - Aluminum shall be of proper alloy for commercial window construction. All extruded sections shall be of 6063-T5 aluminum alloy.

Frame - Main frame and sash members shall be a nominal thickness as required by ANSI/AAMA 101. Main frame shall be 4.000" in depth. Horizontal sash members shall be hollow extrusions. Main frames and sash members are to be extruded aluminum with a structural thermal barrier of high density low thermal conductivity polyurethane, poured and debrided.

Locks - Shall consist of a White Bronze cam latch and keeper at the interlocking meeting rail along with an independent spring loaded latch for the sash.

Balances - Sash will be balanced by standard block & tackle balances. Balances shall hold the sash stationary in any position along the full range of sash travel. Balances shall meet the requirements of AAMA 902.2.

Weatherstripping - Shall be .250 polypile with mylar fins conforming to AAMA 701.2, Specification for Pile Weatherstrip. Weatherstripping shall be doubled at all points of contact of the sash and main frames and at the interlocking meeting rail. A dual vinyl bulb seal will be used at the sill.

III. CONSTRUCTION:

Assembly - Main frame shall be a mechanically joined construction. Corner joints should be "seam sealed" with a quality grade of sealant meeting the requirements of AAMA 803.3. The sash shall be assembled with two screws at each corner. All screws at joints of sash and main frame shall be secured into integral screw ports.

Glazing - Glass shall be factory glazed with an interior aluminum glazing bead with a wedge gasket. The glazing shall be in accordance with actual impact testing options. Glazing options include Insulated Glass Units with Polycarbonate Interlayer (Large & Small Missile). Optional Single Glazed Laminated Units. Single Glazed (Large & Small Missile).

Screens - Screen frame shall be of hollow extruded aluminum frames. Finish shall match the main frames and sash. Insect screening shall be fiberglass or aluminum wire secured with a vinyl spline. Screens shall be half length.

Finish - Shall be a factory applied baked polyurethane powder coat finish meeting the requirements of AAMA 2604 for Pigmented Organic Coating on Extruded Aluminum. Refer to "Colors and Finishes" chart for examples. Bronze anodizing, clear anodizing and high performance AAMA 2605 finishes are optional.

Operation - The lower sash is operable on the "Series 4100HD" Single Hung window and will raise for ventilation. The lower sash is equipped with a release latch so that it will side load "take-out" for ease of maintenance.

IV. PERFORMANCE:

Impact – Shall meet the requirements of AAMA 506-08, ASTM E 1886 and ASTM E 1996.

Structural - Shall meet the requirements of AAMA/WDMA/CSA 101/I.S.2/A440-05, HC/AW75 specification.

Thermal - Shall meet the requirements of AAMA 1503.1.

NFRC – Shall meet the requirements of NFRC 100 and 200.

Forced Entry - Shall meet the requirements for ASTM F588 Load Identification Grade 10.

Life Cycle – Product meets the criteria including passing air and water tests at the conclusion of the cycle test requirements of AAMA 101 and AAMA 910.

Sound Transmission Class - Shall meet the requirements of ASTM E90. Ratings vary depending upon glazing. See Product Selection Guide for summary.

V. INSTALLATION:

Qualifications - Installation shall be performed by skilled, experienced tradesmen. Units shall be installed plumb, level, square and shall be secured in accordance with detailed shop drawings. A non-hardening sealant compatible with aluminum shall be provided by the installer and applied in sufficient quantity to provide a weathertight seal between the window and surrounding construction. All in accordance with actual test methods.

Installation Details - The window manufacturer shall submit complete installation details for the Architects approval. The drawings shall show elevations of windows, full size details of frame and vents, details of construction and anchorage of window. All in accordance with actual test methods.
